

Is Your Large University Network Set Up for Success?

Navigate through our checklist to see if your current provider is setting your large university voice and data network up for success.

YES
NO

Is your current provider helping you improve public safety on your campus with reliable blue light emergency phones?

YES
NO

Does your current provider keep your critical facilities like on-campus hospitals and police departments connected with 24/7 uptime?

YES
NO

Is your current provider experienced with navigating the politics of large university IT systems?

YES
NO

Is your current provider GSA approved — with pre-negotiated rates that public institutions can easily opt in to?

YES
NO

Does your current provider help your campus maintain compliance by providing cyber security services like data backup and restoration?

YES
NO

Does your current provider ensure your network stays patched, updated, and adequately maintained so you can focus on student success and safety instead?

Time to Tally Your Responses

If you answered “yes” to most of these questions, congratulations! Your university network is on the right track to success, but you could still benefit from consulting with ECG to be sure. If you answered “no” to two or more questions, you need to make a change to a service provider who has proven, hands-on experience helping large universities keep voice and data networks connected, compliant, and secure.

The future may be uncertain, but as more students and faculty return to campus, providing a safer, better-connected campus experience is vitally important. **Contact ECG today** to learn more about how our experienced team can help you meet your university’s unique network needs.
